

USHA YEDAVALLY

Title: *Data Analyst* | **Location:** Atlanta, GA

Email: yedavallyusha.y@gmail.com | **Contact:** +1 (334) 220 8767 |

LinkedIn: <https://www.linkedin.com/in/y-usha/> | **Portfolio:** <https://usha2807.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with proven expertise in analytics, visualization, and business intelligence across academic and corporate environments. Skilled in developing interactive dashboards (Power BI, Tableau), building data models, and transforming complex data into actionable insights for strategic decision-making. Proficient in **SQL**, **Python**, and **Spark** for data manipulation and analysis. Experienced with **Azure** and **Databricks** for scalable data pipelines. Adept at automating reports, enhancing KPI accuracy, and driving business performance through data-driven insights

TECHNICAL SKILLS

Programming & Querying: SQL, Python

Visualization & BI Tools: Power BI, Tableau, Excel, Power Pivot, Power Query (M), DAX

Analytics & Reporting: Data Modeling, ETL, EDA, Predictive Analytics, KPI Dashboards, Statistics

Databases & Cloud: MySQL, Azure, Databricks, Snowflake

Methodologies: STAR Schema, Data Warehousing, Data Cleansing, Forecasting, Data Storytelling

PROFESSIONAL EXPERIENCE

Data Analyst

Assurant, Atlanta, GA | July 2025 – Present

- Designed and maintained Power BI dashboards tracking financial and operational KPIs across insurance and warranty business units.
- Utilized SQL and Python for data extraction, transformation, and analysis from multiple enterprise systems.
- Collaborated with cross-functional teams to optimize data models and automate reporting workflows, reducing manual effort by 35%.
- Developed DAX measures and Power Query transformations to ensure data accuracy and performance efficiency.
- Presented business insights to leadership teams, enhancing decision-making and process visibility.

Graduate Teaching Assistant

Auburn University at Montgomery | Jan 2024 – May 2025

- Mentored students in SQL, Python, and Power BI through real-world analytics case studies.
- Designed lab modules on data modeling, ETL, and dashboard creation using Power BI and Excel.
- Conducted workshops on Spark-based analytics and data visualization.
- Improved student analytics-tool adoption by 40% through structured mentoring and training.

Business Intern

Dell Technologies | Hyderabad, India | Feb 2022 – Feb 2023

- Developed Power BI and Excel dashboards for financial and operational analytics.
- Conducted trend and variance analysis to identify growth opportunities and performance gaps.
- Automated manual reporting tasks, reducing recurring workload by 30%.
- Partnered with finance and supply chain teams to enhance KPI tracking and forecasting.

Data Analyst

Adons Softech | Hyderabad, India | Feb 2021 – Feb 2022

- Designed and implemented Power BI dashboards for performance monitoring across business domains.
- Wrote optimized SQL queries and Python scripts for data cleansing and analysis.
- Automated recurring data reports, reducing manual reporting effort by 30%.
- Defined KPIs and improved ETL data accuracy through validation and automation.

LEADERSHIP EXPERIENCE

Vice President – AUM Research Club

Auburn University at Montgomery | Nov 2023 – Aug 2024

- Led interdisciplinary research teams on data-driven projects.
- Conducted hands-on sessions on Power BI, SQL, and Python for club members.
- Organized analytics workshops, doubling member engagement in one semester.
- Built dashboards to visualize research metrics and enhance presentation impact.

PROJECTS

Business Insights 360 – Executive Power BI Dashboard

Tools: Power BI, DAX, Power Query, Excel, MySQL

- Built executive-level dashboard visualizing Net Sales, Gross Margin, and Net Profit by business unit.
- Designed forecasting models reducing out-of-stock risk by 25%.
- Automated reporting workflows for a 50% reduction in manual data refresh time.

AtliQ Hardwares – Sales and Profitability Analytics Suite

Tools: Power BI, Excel, Power Query

- Developed 5 interactive reports analyzing customer trends and profitability.
 - Delivered executive dashboards that improved leadership decisions and boosted sales by 300% in key regions.
 - Reduced monthly reporting effort by 40% through automation with Power Query and DAX.
-

CERTIFICATIONS

- IBM Data Analyst Professional Certificate – Coursera
- Google Foundations: Data, Data Everywhere
- Power BI Data Analytics for All Levels – Codebasics
- Excel: Mother of Business Intelligence – Codebasics

EDUCATION

Master of Science in Management Information Systems

Auburn University at Montgomery | Graduation: May 2025
